

## Arnold Schwarzenegger

**Neuroticism:** Medium high level of neuroticism - always aware and weary of his surroundings which helped his success.

**Extraversion:** Low level of extraversion - he has always been big into self improvement and very focused on what he is able to achieve. He is a very independent and headstrong person.

**Dominance:** High level of dominance - leads to success in his bodybuilding and political careers. Stars as center roles in all movies he's been in.

**Impulsiveness:** Low level of impulsiveness - all his moves are meticulously thought out and planned; would never act rash. Had a very well planned political occupation.

**Agreeableness:** Medium level of agreeableness - very sympathetic towards the less fortunate as shown in his political career, however had to put himself first in many occasions through his life, including in his acting and bodybuilding careers and when he first moved to the states.
